System Requirements:

Mac Windows Client (simplified server) A few months ago we finally started working on a client for Triforce:Transports. We knew it was a difficult task, since the already outdated engine doesn't really make it easy to add features. We knew it was necessary to do it, though, since the upcoming release of Triforce:DLC2 will be the first major feature of the game with a dedicated client. We also hoped that we would get some help with this from the community: after all, it's been a while
