THE FRENCH ANALOG PUBLISHING GAME Fantasy is a genre that takes us away from the realistic world, filled with challenges and boredom, and plunges us in a more exotic and exuberant world. The player is left with emotion and imagination to live the characters' adventures and the fantastic journey. In this world, nothing happens by coincidence, but everything happens because everything wants to happen. Powerful struggles reign supreme. In contrast to classic war games, which are played in the real world, games like these are set in an imaginary world in which the player embodies characters and lives these adventures. Fantasy worlds offer the possibility to play in a completely different reality. They take us from the real world to a fantastic one that is completely made up, while allowing us to act in the real world, complete with our challenges and our daily life. The player directly takes on the role of the character and takes part in the story. Like in books, the fantasy games also allow us to picture it through their written word. In the case of an RPG, we are just to "play". The game is born from the need to find a new light to rejuvenate this genre, as well as the desire to create an innovative game that allows us to experience a spectacular artistic, poetic, and intellectual adventure. WORLD CLASS AND INNOVATIVE: THE DIFFERENCE between our experience and your own is both a beautiful and beautiful journey. Coopérative Forming Company We are a team of illustrators and graphic designers, where we were looking for a good product and work together on it since 2012. The creation of this game represented a real and important milestone in our experience. Our common goal is to develop a fantasy RPG where we combine the quality and experience of Artwork, Graphic Design, Animation and Programming. The French word "RPG" is a portmanteau of the words "Role Playing Game". In this RPG, we have taken to heart the principles of originality and diversity. We wish to achieve both a good gameplay and high levels of immersion. Finally, we have been inspired by the works of the Pied Piper, Warhammer, D&D, Fudge and Tokaido. OPTIMUM DESIGN: DRIVING GAME FEATURES Players, each embodying a character on a map, will meet with other characters

## **What's new in Elden Ring:**

**(via, thanks AlexKuki.org Kuki.org is a grassroots based Tamil language portal providing basic information on the Kuki tribe and related issues. It was created by some leading Kuki rights activists as a social networking portal for the Kukis. The portal also aims to highlight needs of Kuki people and provide access to relevant resources for the Kukis. The portal acts as a teaching resource to help spread awareness and fight the political neglect of Kukis in India. It is funded by a social grant from the Department of Anthropology, University of Cambridge. Overview It was one of the first social media websites for the Kukis. The main aim is to provide basic information on Kuki lore, history, traditional culture, religion and linguistics. The original version of Kuki.org was designed by the staff and resource persons of the Department of Anthropology, University of Cambridge, UK. The Design was inspired by the Natural History Museum of London. The founder of Kuki.org, Dipak Nayak and some of the resource persons and staff are former students of University of Cambridge. Kuki.org serves as a reference to solve some of the problems faced by the Kukis in modern times. It provides links to a wiki that has comprehensive and accurate information about the Kukis. It provides information about other Kuki clans and cultures. Kukis themselves try to solve their problems and many solve various problems thanks to Kukis like Nama Tribe.
