YDGpatch is developed by yDG and is used by 7 users of Software Informer. The most popular versions of this product among our users are: 1.1. When unzipping the patches, you should have two folders, Patches and Patches\_Only. The Patches\_Only should contain an extractable file named "csezq" and a folder named "Ydgpach. The file csezq contains an encrypted file. You may want to extract the file csezq and decrypt that file. Decryption is not required. If the file Ydgpach is not located in the Patches folder, you will need to extract it from the archive. You should have a new folder called Patches. Inside this folder you should have an extractable file called "csezq" and a folder called "Ydgpach. The file csezq contains an encrypted file that can be decrypted to a ZIP file (this file is named "Ydgpach.zip"). If you extract this archive, there will be a file called "Ydgpach. Decryption is not required. If you have a newer version of the software, you will need to extract Ydgpach.zip to locate the new files that are needed. Copy the maps to the unit, then use YDGpatch to patch ttsystem and generate keys for the maps. Or if you're the adventurous kind,. We paste everything on a card we rename the file ~ ttsystem to ttsystem. We patch the PNDnavigator with YDGpatch or TTActivator. 5ec8ef588b
